Informatics graduate from Universitas AMIKOM Yogyakarta with a strong focus on Machine Learning, Data Science, and Artificial Intelligence. Experienced in developing machine learning models, analyzing data, and building interactive dashboards through academic projects, research, and 900+ hours of intensive training in Bangkit Academy 2024. Proficient in Python, TensorFlow, Scikit-Learn, and data analysis tools, with hands-on experience in classification, regression, time-series forecasting, data visualization, and dashboard development using tools such as Power BI, Looker Studio, and Streamlit. First author of a published research study on bank loan approval classification using Logistic Regression, Random Forest, and XGBoost. Demonstrated strong analytical, problem-solving, communication, and teamwork skills in developing data-driven solutions.

EDUCATION

Bachelor of Informatics, Universitas AMIKOM Yogyakarta

GPA : 3,51/4,00 | Cum Laude

September 2022 – October 2026 (Expected)

Relevant Coursework : Big Data & Predictive Analytics, Big Data & Data Mining, Artificial Intelligence, Advanced Artificial Intelligence, Data Mining Project, Research Methodology, Descriptive Statistics

EXPERIENCE

Bangkit Academy 2024 (Google, GoTo, Traveloka)

Machine Learning Cohort

August 2024 – January 2025

- Completed 900+ hours of intensive training in Machine Learning and Artificial Intelligence.
- Developed practical skills in Python, TensorFlow, data preprocessing, and machine learning model evaluation through structured coursework and hands-on assignments.
- Collaborated in a multidisciplinary team consisting of Machine Learning, Cloud Computing, and Mobile Development participants.
- Contributed to the development of J-Go, a machine learning-based mobile application designed to address a real-world problem.

SELECTED PROJECTS

Bank Loan Approval Classification

Python, Scikit-Learn, Logistic Regression, Random Forest, XGBoost

August 2025 – September 2025

- Developed a machine learning pipeline for bank loan approval classification using Logistic Regression, Random Forest, and XGBoost.
- Performed data preprocessing, feature engineering, encoding, normalization, feature selection, and SMOTE to address class imbalance. Evaluated classification using Accuracy, Precision, Recall, F1-score, and AUC.
- Selected and deployed the classification model as an interactive application for relative loan risk assessment.

National Electricity Consumption & Energy Efficiency Analysis

Python, Pandas, Scikit-Learn, Statistical Analysis, Linear Regression

September 2025 – November 2025

- Analyzed electricity consumption, population, and regional economic data across 34 Indonesian provinces from 2017–2023 to identify national and regional energy consumption patterns.
- Developed energy-efficiency metrics based on GDP per capita and electricity consumption per capita, followed by province-level classification using quantile-based analysis.
- Built a multiple linear regression (OLS) model to analyze the relationship between electricity consumption, regional GDP, and population.

Gold Price Forecasting

Python, TensorFlow, GRU, Time-Series Forecasting

May 2026 – June 2026

- Developed a GRU-based time-series forecasting model to predict monthly gold closing prices.
- Compared multiple forecasting scenarios using gold price, USD exchange rate, and inflation as model inputs.
- Applied chronological 70/15/15 train-validation-test splitting and evaluated model performance using MAE, RMSE, MAPE, and R².

Lumpy Skin Disease Prediction

Python, Scikit-Learn, Random Forest, Data Preprocessing

April 2025 – May 2025

- Developed a Random Forest classification model to predict the likelihood of Lumpy Skin Disease in livestock.

- Used spatial and environmental features including geographic coordinates, cattle population density, vapor pressure, and minimum temperature.
- Integrated the trained model into a Streamlit application for interactive prediction and visualization of disease distribution.

J-Go Bangkit Capstone Project

Python, Flutter, TensorFlow, Google Cloud

November 2024 – January 2025

- Developed a machine-learning-enabled mobile application as the Bangkit Academy capstone project.
- Collaborated with a multidisciplinary team across Machine Learning, Cloud Computing, and Mobile Development.
- Integrated machine learning functionality into a mobile application to address a real-world problem.

PUBLICATION

Comparative Study of Logistic Regression, Random Forest, and XGBoost for Bank Loan Approval Classification

Journal of Applied Informatics and Computing (JAIC), Vol. 9, No. 5.

August 2025 – September 2025

- Conducted a comparative study of Logistic Regression, Random Forest, and XGBoost for bank loan approval and credit-risk classification.
- Developed a machine learning workflow involving data merging, preprocessing, feature engineering, feature selection, encoding, Min-Max normalization, and SMOTE for class imbalance handling.
- Evaluated model performance using Accuracy, Precision, Recall, F1-score, and AUC, with Logistic Regression achieving the highest AUC of 0.7415.
- Demonstrated a potential 39.77% reduction in Loss Given Default through implementation of the selected model.

SELECTED CERTIFICATIONS

- | | |
|--|---------------------|
| • TensorFlow Developer Profesional Certificate — DeepLearning.AI / Coursera | November 2024 |
| • Generative AI for Everyone — DeepLearning.AI / Coursera | November 2024 |
| • Supervised Machine Learning: Regression and Classification — DeepLearning.AI & Stanford Online / Coursera | October 2024 |
| • Advanced Learning Algorithms — DeepLearning.AI / Coursera | October 2024 |
| • Belajar Analisis Data dengan Python — Dicoding | Oct 2024 – Oct 2027 |

ORGANIZATION EXPERIENCE

Himpunan Mahasiswa Informatika (HMIF)

Public Relations Division

January 2023 – August 2024

- Managed organizational relationships and supported the development of external partnerships..
- Managed organizational social media across Instagram, TikTok, and YouTube, including content and editing.
- Supported the planning and execution of programs, seminars, workshops, and student development activities.
- Led and coordinated multiple organizational events and committees, including Upgrading II, Belajar Bareng, HMIF Expo, Final Project Guidance, Workshop Informatika × BPC, LDKMO, Kajian Strategis, Dialog Informatika, and other HMIF activities.
- Served in various event roles, including Chairperson, Treasurer, Public Relations, Public Documentation and Publication (PDD), and Consumption Coordinator.

SKILLS

Languages: Indonesian (Native) | English (Professional Working Proficiency)

Soft Skills: Problem Solving | Analytical Thinking | Communication | Teamwork & Collaboration | Leadership | Data-Driven Decision Making | Adaptability

Machine Learning & Data Science: Machine Learning | Deep Learning | Data Analysis | Data Visualization | Classification | Regression | Time-Series Forecasting | Recommendation Systems

Programming & ML Tools: Python | TensorFlow | Scikit-Learn | Pandas | NumPy | Logistic Regression | Random Forest | XGBoost | SVM | GRU

Data Analytics & Dashboard: Microsoft Excel | Power BI | Looker Studio | Streamlit | MySQL | Matplotlib | Seaborn

Development & Design: JavaScript | C++ | C# | HTML | CSS | React | Next.js | Figma | Adobe Photoshop

Office & Cloud: Microsoft Word | Google Cloud | TensorFlow Lite | Git/GitHub
